

ARTESAN®

İNŞAAT TAAHHÜT MÜHENDİSLİK
SANAYİ ve TİCARET LTD. ŞTİ.

About Us

In 1990, we started to work as a private company in the construction sector, we have established in 1997 with ARTESAN CONSTRUCTION CONTRACTING ENGINEERING INDUSTRY and TRADE as the basic policy adopted, quality, aesthetics, speed and we continue to operate with mutual trust.

ARTESAN CONSTRUCTION team consisting of approximately 250 people; Engineers, technicians, formans, operators and qualified workers to do fast and high quality work as a principle.

The personnel of the company are experienced, motivated and working with team spirit.

Our Mission

The vision of ARTESAN CONSTRUCTION is to be a leader in the industry and to set standards in the fields in which it operates.

Our Vision

Preserving its values is to be a reliable provider that creates and differences in Turkey and world markets.

Consultancy Services

Project Management

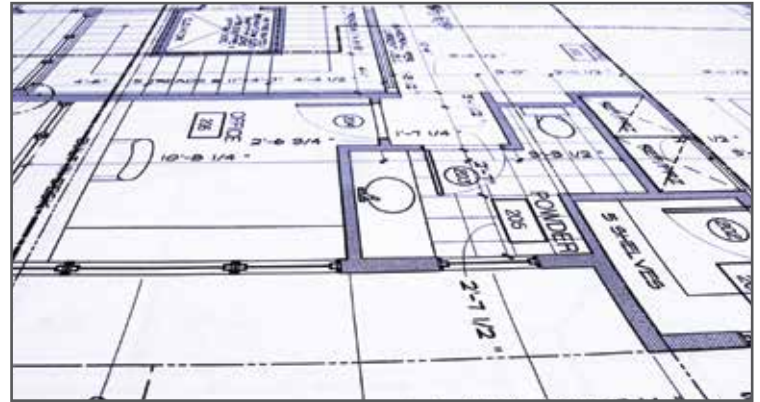

It provides project management services to complicated projects requiring planning and cash flow. Within the scope of this service, the coordination of the office and field teams of the construction, the cash flows of subcontractors and the follow-up of the work programs, the follow-up of the material quality controls, the supervision of the fabrications, the project control etc. such as the construction of all branches of the construction is carried out.

Planning

Work Program and Planning for all construction works are underway at the project stage and the Workflow Diagram (CPM) is created by modern computer techniques. Worksite production is evaluated in the work schedule and the program is updated. With the help of the constantly updated Work Program, the works which are in critical condition, the estimated end time of the productions and the cash requirement of the construction site are kept under control. In addition, the balance of planning services is ensured by resource balancing.

Design

Architectural, Static, Electrical, Mechanical Projects of a building are all created in our company with modern computer calculations and drawing programs.

Construction and Reconstruction Consultancy

All kinds of construction, project and manufacturing works, the final account, progress payment accounts and determination of the receivables of the parties and zoning legislation related to all kinds of zoning issues are provided by the Consultancy.

Contracting Services

Superstructure Services

We are serving in contracting works with our professional teams in accordance with the projects, work programs and occupational safety of the current works of all construction items such as Housing Constructions, A.V.M constructions, Hotel constructions, Hospital constructions, Industrial Building Constructions, floor works, rough and fine construction works.

Building Revisions

We are currently serving in the field of constructions for strengthening and architectural renewal of the building for the reconstruction and renovation of existing structures in structures already in use or for the structure to become functional again in the buildings which have lost its functionality.

Infrastructure Services

We work with our professional teams in accordance with the work programs and work safety in the development of the ground, planning of the current works in the deep excavations, maintenance and maintenance works of the road construction and maintenance works.

Landscape Design

In natural and cultural landscaping, landscaping is designed in accordance with the design and aesthetics of the existing area and the productions are made in accordance with the project.
